Health and Lifestyle

Lifestyle is referred to the characteristics of inhabitants of a region in special time and place. It includes day to day behaviors and functions of individuals in job, activities, fun and diet. In recent decades, lifestyle as an important factor of health is more interested by researchers. According to WHO 60% of related factors to individual health and quality of life are correlated to lifestyle.

5 Millions of people follow an unhealthy lifestyle. Hence, they encounter illness, disability and even death. Problems like metabolic diseases, joint and skeletal problems, cardio-vascular diseases, hypertension, overweight, violence and so on, can be caused by an unhealthy lifestyle. The relationship of lifestyle and health should be highly considered.

10 Today, wide changes have occurred in life of all people. Malnutrition, unhealthy diet, smoking, alcohol consuming, drug abuse, stress and so on, are the presentations of unhealthy life style that they are used as dominant form of lifestyle. Besides, the lives of citizens face with new challenges. For instance, emerging new technologies within IT such as the internet and virtual communication networks, lead our world to a major challenge that threatens the physical and mental health of individuals. The challenge is the overuse and misuse of the technology. Therefore, 15 according to the existing studies, it can be said that: lifestyle has a significant influence on physical and mental health of human being.

In some countries, the overuse of drugs is a major unhealthy lifestyle. Iran is one of the twenty countries using the most medications. They prefer medication to other intervention. Furthermore, in 15–40% of cases most of people use medications about without prescription. Pain 20 relievers, eye drops and antibiotics have the most usage in Iran. While self-medications such as antibiotics have a negative effect on the immune system, if the individual would be affected by infection, antibiotics will not be effective in treatment. Overall, 10 percent of those who are self-medicated will experience severe complications such as drug resistance. Sometimes drug allergy is so severe that it can cause death.

25 Finally, variables of lifestyle that influence on health can be categorized in some items: Diet and Body Mass Index (BMI), the greatest factor in lifestyle which has a direct and positive relation with health, exercise for treating general health problem; sleep; sexual behavior; substance abuse considered as an unhealthy lifestyle; medication abuse; application of modern technologies which misuse may result in unpleasant consequences; recreation; and study, a key factor in lifestyle that 30 may lead to more physical and mental health.

PART THREE: WRITING

30%

During your vacation, you go to Accra in Ghana with your friends for a linguistic visit. During this period of time, the food you eat in the canteen is of bad quality and poorly-cooked. This situation is alarming you. So you decide to write a letter to the Manager of this canteen to denounce this problem and request actions to put an end to it.

In your letter:

- **Say why you are writing the letter.**
- **Mention some consequences of this situation.**
- **Suggest some solutions to solve the problem.**

Note : the Manager's address is: P.O Box 12 Accra,Ghana
